British Medical Association

CURRENT NOTES

Appointment with Investment

The British Medical Association has received inquiries from a number of members who have been approached by the English and Scottish Law Trust Company, Ltd., of which Mr. A. J. W. Grieg is described as the Managing Director. The proposal made is that if they will take up a number of shares in this company they, in return, will be appointed members of the board, and have cases sent to them for annual overhaul under a scheme of insurance the company is seeking to organize, and for which they will receive an agreed fee per case. It is well that members should consider very carefully the possibility of exception being taken on ethical grounds to their accepting cases under such circumstances. Further, as it is well known that the majority of medical men are not good business men, the suggestion may be made to members that before investing money in this or any other concern they ought to take steps to assure themselves so far as possible of the general and financial standing of the concern and those associated with it.

Annual Meeting of the Canadian Medical Association

The Annual Meeting of the Canadian Medical Association is to be held in Toronto during the week beginning June 20th, 1932, and the Executive of that meeting being anxious, if possible, to have some visitors from this side of the water who would take part in the proceedings, has asked for the co-operation of the British Medical Association. The Medical Secretary would be very glad to hear from any member who proposes to visit Canada next June.

NATIONAL EYE SERVICE

NATIONAL OPHTHALMIC TREATMENT BOARD

Medical practitioners are reminded that there is now in existence a national scheme for the provision of ophthalmic examination and glasses, at low inclusive fees, available to the following classes of the community:

1. State-insured persons, whether or not they are entitled to ophthalmic benefit.
2. Dependants of insured persons.
3. Non-insured persons whose total family incomes do not exceed £250 a year.

All that is necessary for medical practitioners to do is to advise those of their patients who, in their opinion, need skilled advice about their eyes, to call upon the local representative of the National Ophthalmic Treatment Board, by whom all arrangements will be made for examination and the supply of glasses if required.

The following is a list of towns throughout the country in which the Board is able to give service, with the addresses of the local representatives. Alterations and additions to this list will be published in the *Journal* periodically for the information of medical practitioners.
